Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
 (Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

DETAILED ACTION

Status of Claims

1. The present application is being examined under the pre AIA first to invent provisions.
2. This action is in reply to the terminal disclaimer filed on **01/25/2018**.
3. Claims 23 42 are currently pending and have been examined.

Allowable Subject Matter

4. Claims 23 42 are allowed. See Reasons for Allowance under separate heading.

Reasons For Allowance

5. The following is an Examiner's statement of reasons for allowance:

The Examiner has carefully reviewed the Applicants arguments and assertions filed on **07/26/2017**. Based upon the Applicants arguments and assertions the Examiner is persuaded by and agrees with the Applicant. With regard to the rejections under 35 USC § 101 based upon the Alice Corporation Pty. Ltd. v. CLS Bank guidelines, the Examiner finds that the claimed invention amounts to significantly more than a judicial exception or an abstract idea. The rejection under 35 USC § 101 is hereby withdrawn. With regard to the prior art of record, the Examiner has carefully reviewed the Applicants arguments and assertions filed on **07/26/2017**. Based upon the Applicants arguments and assertions the Examiner is persuaded by and agrees with the Applicant.

Reno does not teach or suggest generating, at a browser toolbar, a cryptographic key. Reno indicates that "a user could enter a static or dynamic password to access a local credential (e.g. cryptographic key store, biometric), remote credential (e.g. cryptographic key roaming server). Reno also discloses that "the security application uses an organization's public key that must be signed and chained to a trusted CA to encrypt the user's sensitive information." Reno does not include any discussion about the origin of these keys. In addition, Reno does not teach or suggest decrypting encrypted data received from the secure database. Reno discloses how "the security application uses an organization's public key that must be signed and chained to a trusted CA to encrypt the user's sensitive information." Paragraph [0036] then explains that "the trusted source receives the transmission from the user" and, "[i]f necessary, the source uses its private key to decrypt the transmission" (emphasis). This paragraph is describing the "trusted source" as being the one receiving information from the "security application," not the security application (corresponding to the alleged "browser toolbar") receiving information from the trusted source. This portion of Reno therefore cannot be said to teach or suggest "using, by the browser toolbar, the cryptographic key to decrypt encrypted data received from the secure database."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- **MATSUMOTO, ET AL.** (JP 2007/156806 A) DISCLOSES, "A service provider server stores a wallet for centrally managing as a bookmark merchandise information found at virtual shops on the Internet and digital merchandise information obtained at real shops, in association with user identification information; and at the user's request, displays the stored wallet as merchandise information on an Internet browser together with a toolbar having a menu of predetermined functions and, when the user selects any function on the toolbar, executes the predetermined function."
- **CHANG et al.** (EP 880254 A2) discloses, "The financial transaction processing system includes at least one financial server connected through a public network to a number of users associated with client computers. Each user accesses the financial server through a web browser. The web browser is provided with the capabilities to generate encryption keys, to encrypt and decrypt HTML forms, and to digitally sign and timestamp HTML forms. The financial server transfers web pages including HTML forms representing financial transactions. The HTML forms contain extensions that specify the format of an incoming format and the format of a returned form. An HTML form can be transmitted in an encrypted format, in a format including a user's digital signature and timestamp, and in an encrypted format that contains the user's digital signature and timestamp. The financial server tracks each processed transaction through an audit trail including the user's account, the user's digital signature, the timestamp of the transaction, and the text of the transaction."
